Gov. Kay Ivey stated on Wednesday to the media that the reality is there will be a toll, well the reality is we could have no tolls if state employees were productive and not spending state time and resources sending and receiving nude photos and seeking sex.

Our IT professionals in the Block the Toll Group has discovered that [REDACTED] is focusing more on seeking sex than [REDACTED].

The IT professionals has told us that on both gay and heterosexual dating sites that you just put in an address of state offices and it shows you who is online during working hours. Many were found on various sites. How can the state charge a toll if they cannot control state employees surfing dating and sex sites?

Through a facebook search, the other guy in the profile photo is

[REDACTED]. The state

needs to stop these rogue state employees before charging a toll

on South Alabama. We are also asking for the October 7 meeting

to be moved to the Mobile Civic Center. We have discovered

many more state employees abusing state time and resources.
